Accelerate your business

Provide superior B2B experience
and B2B cash flow to get new
customers that are looking for
enhancing of advance and cash
payments

A screenshot of a payment scheduling interface, tilted at an angle. The interface is light gray with white text and red accents. At the top, it shows 'Payment Amount: \$35.00' in red and 'Account Balance: -580.00 USD' in red. Below this, 'Account Number: 101022018171' is displayed. The 'Select Pay Method:' section has two options, both with a bank icon: 'Bank: Morgan Stanley, Account: 101022018171, Currency: USD' (selected with a red radio button) and 'Bank: Morgan Stanley, Account: 101022018187, Currency: EUR' (unselected with a gray radio button). An 'Add New Payment Method' button is below. The 'Frequency:' section has 'Periodic' selected (red radio button) and 'One Time Only' (gray radio button). The 'Frequency:' dropdown is set to 'Monthly (every 20 day)'. The 'Select Start Month:' dropdown is set to 'April 2022'. The 'Select End Month:' dropdown is empty. A 'No End Date' checkbox is checked. The 'Installment Schedule:' dropdown is set to 'In equal installments for 3 months'. At the bottom, a red button says 'Create Scheduled Payment' and a gray button says 'Cancel'. A note at the bottom reads: 'We'll send you a notification once each payment is made. You can cancel sheduled payment at any time.'

Automate your accounting routine

Get rid of boring and time-consuming accounting tasks with automated invoicing for legal entities

Kyivstar (VEON group)

Reference Case

The leading mobile operator in Ukraine, Kyivstar, which is part of the VEON group of companies, has implemented an innovative collaborative development approach in one of its major projects to migrate tariffing and contract billing functions to new platforms from the outdated BIS system of Nexign company - in stages migrated wireline and Internet services, and then Home Internet (FTTB) and TV (Fixed-Mobile Convergence) services to the new core of post-paid billing WideCoup BSS using the [MEF.DEV](#) serverless development platform.

VEON

CIO, Kyivstar
Andrey Zhukovskiy

"Our employees joined forces with the NATEC engineers and were able to implement a complex integration project in the shortest possible time, in which they combined a number of Legacy systems that ensure the operation of many services with a new service development platform - for this the systems are working successfully and showing excellent results."

Acknowledged by global leaders

NATEC is a provider of BSS software development solutions for communications service providers (CSPs). NATEC's primary offerings include the WideCoup BSS solution and the MEF.DEV platform, a framework that can be used to support incumbent and legacy BSS solutions through a number of API access points.

<https://www.analysysmason.com/research/content/company-profiles/natec-digital-transformation-rma03-rma09/>

NATEC has key competence in the implementation of BSS telecom solutions under the MEF.DEV® and WideCoup® brands. The emphasis on the development of boxed solutions favorably distinguishes NATEC among various outsourcing software development companies. Collaboration with mobile operator Kyivstar (VEON Group) to use NATEC billing solutions as an innovative postpaid BSS solution provides new opportunities for digital transformation in the telecommunications market.
